

Modular Automatic Transfer Switch ATyS **M** : the fully integrated ATS solution

As a worldwide leading company in changeover solutions Socomec launches a new generation of changeover switches.

Application:

- Network / Generator Set
 - Generator set control
 - ATS solution
- Network / Network
 - Building services
 - Control with or without priority

Originality and advantages:

- ATyS **M** is a modular changeover system with fully integrated internal security and mechanical and electrical interlocking.
- This innovative concept patented by Socomec combines the benefits of switching technology and fast operation with unique control flexibility.
- The integrated "Manual Security" function is operated via a standard Allen key.
- A complete range of standard accessories is available: bridging bars, voltage sensing kits, positions I-0-II auxiliary contact, terminal shrouds, etc.

Features:

ATyS **M** is a product family for electrical changeover applications up to 160 A.

- ATyS **M** products are available for remote (ATyS **M** 3s) or automatic (ATyS **M** 6) control and can be used for all types of changeover applications between 2 networks or between a network and a generator set.

Date of market launch:

January 2008
