

Remote Isolation Switch (RIS)

Enclosed switch-disconnector
for railway applications

When **energy** matters

 **socomec**
Innovative Power Solutions

The close protection of your urban railway infrastructure!

Socomec's Remote Isolation Switch (RIS) solutions are designed and manufactured in France to guarantee high levels of quality, performance and functionality. They will enable you to electrically isolate your traction infrastructure - locally or remotely.

Increased peace of mind
with a vandalism
– proof enclosure –
designed to last.

1 Double door system
in order to ensure the safety of the public in urban areas and of operators during interventions (IP2X).

2 DC switch-disconnector

- Ratings: 630 A to 2000 A (Cat IV).
- Motorized or manual operations.
- Up to 3 padlocks.

**Made-to-measure design,
100% Socomec**
To guarantee you a different and unique solution that is adapted to technical and urban planning constraints, Socomec RIS can be configured according to your needs. One or more features can be added to the solution.

Contact our experts to define your need.

3 Easy and safe visual check
of the switch-disconnector thanks to the visualisation window.

4 A robust enclosure IP 55/IK10
guaranteeing long life in the outdoor environment and avoiding any degradation (break-in, graffiti, etc.).

**5 Voltage monitoring system
DIRIS Digiware DC**
signals the presence of voltage and logs voltage events capable of damaging your installation.

 **Safe operations**

- Differentiated and protected access (IP2X) to control and power compartments for total safety.
- Lockout up to 3 padlocks.
- Isolating internal protection avoids the risk of electrical ignition between the structure and live parts, in order to ensure the safety of people.

 **Reinforced enclosure and vandalism resistant design**

- Metallic enclosure resistant to external environment (UV, frost, impacts, etc.).
- Optional stainless steel cabinet for the harshest environments.
- Vandalism resistant design: resistance class RC2 (EN 1627), reinforced lock and invisible hinges.

 **Easier maintenance**

- Safe visual inspection, thanks to a visualization window inside the cabinet.
- Easily change the switch motor (4 face-mounted bolts) without interrupting the load.
- Works without ventilation, freeing you from filter cleaning and ventilation maintenance.
- Automatic lighting when the door is opened.

 **Detailed voltage monitoring**

- Help you to anticipate malfunctions due to inappropriate voltages.
- Anticipate malfunctions due to inappropriate voltages and events.
- Data can be viewed locally on the display or remotely via communications.
