

Transfer Switching Equipment from 4000 to 6300 A

ATyS d H

Why choose Socomec's **ATyS d H**?

Constant power availability keeps your activity safe and efficient. At Socomec, we have been designing, manufacturing and testing switchgear since 1922 and guarantee safe, reliable and long lasting Transfer Switching Equipment (TSE) for your electrical installation. All our solutions are fully compliant with Class PC of IEC 60947-6-1, the international product standard for TSE.

Today, more than 3 million installations and major integrators worldwide are secured with a Socomec transfer switch.

**Ready
to integrate**

Complete functional unit with integrated interlocks ready to be installed in any enclosure of your choice.

**Easy
to order**

Select from 3 or 4 pole, 4000, 5000 or 6300 A versions.

**Quick
installation**

Connect the bars on the rear side of the ATyS d H and cable the control wires to any genset or ATS controller in the market. Forget about hard installations where you need to connect several products to make it work.

**Proven
technology**

An integrated solution that has been engineered and tested according to IEC 60947-6-1 Class PC standard requirements for transfer switching.

Why do you need Transfer Switching Equipment (TSE)?

Power outages can occur, even in high reliability distribution networks, leading to major incidents and losses on critical applications :

- Emergency systems.
- Healthcare facilities.
- Server rooms.
- Production lines.

To maximize your power availability, the Socomec range will safely transfer from any unstable or lost source to an alternate source. Furthermore, we ensure that you are prepared at all times thanks to our unique safety functions that facilitate maintenance on your low voltage electrical installation.

Managing high ratings to provide maximum availability in your application

Contact us to find out how your application could benefit from ATyS d H.

Data Center upstream secure transfer

Availability is one of the most used words in data centers. By combining a robust solution with high MTBF - quick to replace and easy to repair TSE - you have the assurance of high overall system availability, decreasing your data center downtime while securing your business.

Ready to integrate in the enclosure of your choice

ATyS d H is a complete transfer switch that can be installed in any enclosure of your choice. All ratings maintain the same overall dimensions to make your system simpler than ever - and it is now possible to upgrade without changing the enclosure.

Backup source transfer for industrial applications

For some processes, downtime is simply not an option. Even using a UPS with limited backup time to ensure continuity, most industries cannot afford to compromise on productivity and always include a backup source with a safe and integrated transfer solution.
