

COMBINED SIDERMAT DIN

Fuse combination switches with tripping function

from 800 A to 1800 A

SIDERMAT fuse-combination switches from 800 to 1800 A

The solution for

- > Healthcare
- > Energy
- > Infrastructure & Transport
- > Industry

Strong points

- > Automatic tripping
- > Optimum safety
- > High breaking capacity

Extended range

- > To use with uR fuses for the protection of power semiconductors, please consult us.

Conformity to standards

- > IEC 60947-3
- > IEC 60269-1
- > IEC 60269-2

Function

COMBINED SIDERMAT DIN are manually operated 3 or 4-pole fuse load break switches with a remote tripping function.

They provide load operation, safety disconnection and protection against overloads and shortcircuits in any low voltage electrical circuit. They can ensure the automatic opening of the circuit together with:

- fuse blown detection system (see DDMM or FMD),
- thermal relay,
- differential relay (see RESYS),
- other safety devices.

Advantages

Automatic tripping

COMBINED SIDERMAT DIN is the only fuse combination switch that allows automatic remote opening by means of a coil associated with an external device.

Optimum safety

Visible double breaking indication by phase (up and downstream from the fuse) to show the actual position of contacts and keep personnel and equipment protected from overcurrent.

High breaking capacity

High breaking capacity fuses (100 kA rms) provide protection from overloads and short circuits.

General characteristics

- For industrial fuses up to 1800 A.
- 3P or 4P available.
- Direct or external handle.
- NFC and DIN fuses.

COMBINED SIDERMAT DIN

Fuse combination switches with tripping function
from 800 A to 1800 A

Configurations

Functional diagram (for further details see the installation instructions supplied with the product).

1. Direct front operation.
2. External front operation.
3. NO/NC auxiliary contact for each position.
4. NO/NC auxiliary contact with standard shunt trip coil control.

COMBINED SIDERMAT DIN

Fuse combination switches with tripping function
from 800 A to 1800 A

Shaft for external operation

Use

Standard lengths:

- 200 mm
- 320 mm.

Other lengths available - please contact us.

Front operation				
Rating (A)	Side X (mm)	Shaft length (mm)	Type	Reference
800	350 ... 450	200	15 x 12	1401 1520
800	350 ... 570	320	15 x 12	1401 1532
1250 ... 1800	370 ... 570	320	15 x 12	1401 1532

Auxiliary contact

Use

Pre-break and signalling of positions 0 and I: 1 to 2 NO/NC auxiliary contacts.

Coil tripping

1 to 2 NO/NC auxiliary contacts.

Connection to the control circuit

By 6.35 mm fast-on terminal.

Characteristics

NO/NC auxiliary contact IP2.

Electrical characteristics

30,000 operations.

NO/NC position contact

220 VDC	3990 4220	3991 4220

Use

Omnipolar breaking remotely controlled by a shunt trip or undervoltage release coil.

Note: the shunt trip coil must not be supplied for more than 5 s.

Coil mounted as standard on the device: shunt trip coil. To modify the coil, order one of the references opposite with the device.

Shunt

access_049_a_1_cat

Undervoltage trip coil

access_050_a_1_cat

Current-reducing resistor for undervoltage trip coil

Use

By limiting the current, the resistor reduces the effects on undervoltage trip coils used in continuous processes or those exposed to high ambient temperatures.

Voltage	Reference
110 VAC	3999 3112
230 VAC	3999 3230
400 VAC	3999 3400
110 VDC	3999 4110

Terminal screen

Use

Top and bottom protection from direct contact with terminals or connection parts.
