

Heating resistors

Thermal regulation

The solution for

- > Power distribution

Strong points

- > Compact design
- > Long service life
- > Maintenance-free
- > Rapid fixing

Conformity to standards

- > EN 55014
- > EN 50082-1
- > EN 60335-1

Function

The heating resistor is designed to maintain the enclosure temperature above the dew point.

Models

- Natural ventilation.
- Natural ventilation - Class II.
- Fan ventilation.

Range

- Heating power from 15 to 400 W.

General characteristics

- Terminal connections.
