

FUSERBLOC uR

Fuse combination switches for protecting power semiconductors
50 to 1250 A

fuser_437.eps

The solution for

- > Energy
- > Industrial

Strong points

- > Limiting the short-circuit current
- > Optimum safety
- > High breaking capacity

Conformity to standards

- > IEC 60947-3
- > EN 60947-3

Function

FUSERBLOC uR are multipole fuse combination switches with manual right and front operating and high-speed fuses.

When used in combination with high-speed fuses (uR curve), they can break or make under load, provide safe isolation and protection from overcurrent for power semiconductors (variable drives, inverters, etc.) up to 1250 A.

This range includes versions for direct and external operation, 2, 3 and 4 poles and up to 1250 A.

Advantages

Limiting the short-circuit current

This fuse solution for limiting the shortcircuit current is by far the most efficient and economical on the market (uR fuses).

High breaking capacity

High breaking capacity fuses (300 kA rms) provide protection from overloads and short circuits.

Optimum safety

Double phase breaking (upstream and downstream from the fuse) and fully visible isolation keep people and equipment protected from overcurrent.

General characteristics

- For high-speed fuses up to 1250 A.
- Up to 690 VDC in AC22B and 1250 VDC in DC20.
- Cylindrical, knife type, K50 and K110 uR fuses up to 1250 VDC off load.

FUSERBLOC for 690 VAC uR cylindrical fuses

Features

FUSERBLOC CD 50 A for fuse size 14 x 51									
Fuse rating (A)	10	12	16	20	25	32	40	50	
Max. I for the FUSERBLOC (A)	10	12	16	20	25	29	36	40	
FUSERBLOC CD 125 A for fuse size 22 x 58									
Fuse rating (A)	20	25	32	40	50	63	80	100	
Max. I for the FUSERBLOC (A)	20	25	32	40	50	63	71	85
